JUVENILE LIFE WITHOUT PAROLE: AN OVERVIEW

Approximately 2,500 individuals are serving a life sentence without possibility of parole for crimes committed as teenagers. This policy choice is not shared among all states. Sixteen states and the District of Columbia have banned life sentences without the possibility of parole for juveniles; in a handful of other states, no one is serving the sentence.

Following the 2012 U.S. Supreme Court ruling in Miller v. Alabama, states and the federal government are required to consider the unique circumstances of each juvenile defendant in determining an individualized sentence. For juveniles, the use of life sentences without the possibility of parole, as a mandatory minimum, is unconstitutional.

Research on adolescent brain development confirms the commonsense understanding that children are different from adults in ways that are critical to identifying age-appropriate criminal sentences. This understanding – Justice Kennedy called it what “any parent knows” – was central to three recent Supreme Court decisions excluding juveniles from receiving the harshest sentencing practices.

SUPREME COURT RULINGS

Three watershed Supreme Court rulings banned the use of capital punishment for juveniles, limited life without parole sentences to homicide offenders, and banned the use of mandatory life without parole. Most recently, the Court ruled that judges must consider the unique circumstances of each juvenile offender, banning mandatory sentences of life without parole for all juveniles in 2012.

ROPER V. SIMMONS, 543 U.S. 551 (2005)

The Supreme Court ruled that juveniles cannot be sentenced to death, writing that the death penalty is a disproportionate punishment for the young; immaturity diminishes their culpability, as does their susceptibility to outside pressures and influences. Lastly, their heightened capacity for reform means that they are entitled to a separate set of punishments. The court also held that the nation’s “evolving standards of decency” showed the death penalty for juveniles to be cruel and unusual; 12 states banned the death penalty in all circumstances, and 18 more banned it for juvenile offenders. The Roper ruling affected 72 juveniles on death row in 12 states.

GRAHAM V. FLORIDA, 130 S. CT. 2011 (2010)

Having banned the use of the death penalty for juveniles in Roper, the Court left the sentence of life without parole as the harshest sentence available for offenses committed by people under 18. In Graham v. Florida, the Court banned the use of life without parole for juveniles not convicted of homicide. The ruling applied to at least 123 prisoners – 77 of whom had been sentenced in Florida, the remainder in 10 other states. As in Roper, the Court pointed to the rare imposition of a particular punishment to prove that the punishment is unusual.

Court precedent recognizes that non-homicide offenses do not warrant the most serious punishment available. Thus, having defined the maximum punishment for all juvenile offenders (life without parole), the Court ruled that the harshest punishment must be limited to the
States that have banned or limited the use of juvenile life without parole sentences

The Court called life without parole “an especially harsh punishment for a juvenile … A 16-year-old and a 75-year-old each sentenced to life without parole receive the same punishment in name only.” Limiting the use of life without parole did not guarantee such individuals would be released; it guaranteed a “meaningful opportunity” for release.

**MILLER V. ALABAMA AND JACKSON V. HOBBS, 132 S. CT. 2455 (2012)**

Following *Roper’s* exclusion of the death penalty for juveniles and *Graham’s* limitation on the use of life without parole, approximately 2,500 offenders were serving sentences of life without parole for crimes committed as juveniles, all of whom were convicted of homicide.

In 2012, deciding *Miller* and *Jackson* jointly, the U.S. Supreme Court held that, for juveniles, mandatory life without parole sentences violate the Eighth Amendment. Writing for the majority, Justice Kagan emphasized that judges must be able to consider the characteristics of juvenile defendants in order to issue a fair and individualized sentence. Adolescence is marked by “transient rashness, proclivity for risk, and inability to assess consequences.”
assess consequences,” all factors that should mitigate the punishment received by juvenile defendants.\(^\text{10}\)

**RETROACTIVITY FOLLOWING MILLER**

The *Miller* ruling affected mandatory sentencing laws in 28 states and the federal government. States have been mixed in interpreting the retroactivity of *Miller*. Fourteen state Supreme Courts (Arkansas, Connecticut, Florida, Illinois, Iowa, Massachusetts, Mississippi, Nebraska, New Hampshire, New Jersey, Ohio, South Carolina, Texas, and Wyoming) have ruled that *Miller* applies retroactively while seven other states (Alabama, Colorado, Louisiana, Michigan, Minnesota, Montana, and Pennsylvania) have ruled that *Miller* is not retroactive. In addition, California, Delaware, Nebraska, Nevada, North Carolina, and Wyoming passed juvenile sentencing legislation that applied retroactivity.\(^\text{11}\)

The question will eventually be settled at the U.S. Supreme Court, which has agreed to hear the case of 68-year old Henry Montgomery,\(^\text{12}\) who has been imprisoned with no chance of parole since 1963. Oral arguments will take place in the fall of 2015.

**LEGISLATIVE RESPONSES TO MILLER**

Since 2012, 21 states have changed their laws for juvenile offenders convicted of homicide (including felony murder). All but four had previously required life without parole in these circumstances. These new laws provide mandatory minimums ranging from a chance of parole after 15 years (as in Nevada and West Virginia) to 40 years (as in Texas and Nebraska). Thirty-four states still allow life without parole as a sentencing option for juveniles. In most states, the question of virtual life without parole has yet to be addressed.

**PEOPLE SERVING JUVENILE LIFE WITHOUT PAROLE SENTENCES**

Seventeen states and the District of Columbia do not have any prisoners serving life without parole, either due to laws prohibiting the sentence or because there are not any juveniles serving the sentence at this time. Thus, while 34 states allow the sentence, just four – Pennsylvania, Michigan, Louisiana and California – account for about half of JLWOP sentences. (Following the passage of California’s SB 9 in 2013, most of that state’s juvenile life-sentenced prisoners are being resentenced.) Approximately 2,100 of those serving life without parole were sentenced mandatorily.\(^\text{13}\)

**CHILDHOOD EXPERIENCES**

The life experiences of the approximately 2,500 people serving juvenile life sentences vary, but they are often marked by very difficult upbringings with frequent exposure to violence; they were often victims of abuse themselves. Justice Kagan, in the *Miller* ruling, ruled that Alabama and Arkansas erred because a mandatory sentencing structure does not “take[ ] into account the family and home environment.”\(^\text{14}\) The petitioners in the cases, Kuntrell Jackson and Evan Miller, both 14 at the time of their crimes, grew up in highly unstable homes. Evan Miller was a troubled child; he attempted suicide four times, starting at age 6.\(^\text{15}\) Kuntrell Jackson’s family life was “immers[ed] in violence: Both his mother and his grandmother had previously shot other individuals.”\(^\text{16}\) His mother and a brother were sent to prison. The defendant in *Graham*, Terrance Graham, had parents who were addicted to crack cocaine.\(^\text{17}\)

In 2012, The Sentencing Project surveyed people sentenced to life in prison as juveniles and found the defendants in the above cases were not atypical.\(^\text{18}\)

- 79% witnessed violence in their homes
- 32% grew up in public housing
- 40% had been enrolled in special education classes
- Fewer than half were attending school at the time of their offense
- 47% were physically abused
- 80% of girls reported histories of physical abuse and 77% of girls reported histories of sexual abuse

**RACIAL DISPARITIES**

Racial disparities plague the imposition of JLWOP sentences.\(^\text{19}\) While 23.2% of juvenile arrests for murder involve an African-American suspected of killing a white person, 42.4% of JLWOP sentences are for an American-American convicted of this crime. White juvenile offenders with African-American victims are only about half as likely (3.6%) to receive a JWLOP
sentence as their proportion of arrests for killing an African-American (6.4%).

**COST OF LIFE SENTENCES**

Aside from important justice considerations, the financial cost of JLWOP sentences is significant. A life sentence issued to a juvenile is designed to last longer than a life sentence issued to an older defendant.

A life sentence issued to a juvenile is designed to last longer than a life sentence issued to an adult.

Housing juveniles for a life sentence requires decades of public expenditures. Nationally, it costs $34,135 per year to house an average prisoner. This cost roughly doubles when that prisoner is over 50. Therefore, a 50-year sentence for a 16-year old will cost approximately $2.25 million.

**WHAT MAKES YOUTH DIFFERENT?**

In amici briefs written on behalf of the young defendants in Roper, Graham, and Miller, organizations representing health professionals, such as the American Academy of Child Adolescent Psychiatry and the American Psychological Association, explained current research on immature brains.

In Miller, Justice Kagan noted that adolescence is marked by “immaturity, impetuosity, and failure to appreciate risks and consequences,” all factors that limit an adolescent’s ability to make sound judgments. Justice Kagan cited Graham and J. D. B. v. North Carolina in noting that juvenile defendants are at a substantial disadvantage in criminal proceedings; they are less able than adults to assist in their own defenses (working constructively with counsel) and they are likely to respond poorly to the high pressures of interrogation. Even before Roper, states routinely recognized differences between juveniles and adults in other contexts. Almost every state prohibits juveniles from voting, buying cigarettes and alcohol, serving on juries, and getting married without parental consent. Teenagers’ drivers licenses are typically restricted through age 18.

The Graham decision emphasized the importance of giving juvenile offenders a chance to become rehabilitated. These individuals have a substantial capacity for rehabilitation, but many states deny this opportunity: approximately 62% of people sentenced to life without parole as juveniles reported not participating in prison programs in large part due to state prison policies that prohibit their participation or limited program availability. They typically receive fewer rehabilitative services than other prisoners.

**MOMENTUM FOR REFORM**

Eliminating juvenile life without parole does not suggest guaranteed release of these offenders. Rather, it would provide that an opportunity for review be granted after a reasonable period of incarceration, one that takes into consideration the unique circumstances of each defendant. In many other countries the period before a mandated review is 10 to 15 years. If adequate rehabilitation has not occurred during these years in prison, as decided by experts, the individual may remain in prison and his/her case be reviewed again in another few years. Nor is it appropriate to eliminate life sentences in name only, replacing them with excessively lengthy prison terms that can reasonably expected to last for an offender’s entire life.

There is mounting support for such reform in select states. Motivated by the Miller decision, the state of California (home to one of the largest populations of JLWOP defendants) now affords prisoners a meaningful chance at parole after 15 to 25 years if their crime occurred when they were a juvenile. Reforms are underway in other states as well. Sentences that close the door on rehabilitation and second chances are cruel and misguided.
